ahmad.mabni.org | linkedin.com/in/ahmadchoueib

## PROFESSIONAL SUMMARY

IT and AI implementation specialist and full stack developer with more than eight years in technology education. Support organizational IT, administer ChatGPT workspaces and train teams in ChatGPT, Codex and Microsoft 365. Founder of MABNI, delivering websites, dashboards and operational systems from requirements to deployment, alongside university teaching in computing and applied AI.

## CORE SKILLS

AI implementation and team training | ChatGPT workspace administration | Codex | Microsoft 365 | IT operations | Networking | Node.js/MySQL | Websites and dashboards

## PROFESSIONAL EXPERIENCE

### Computer Educator and IT Specialist

Tahaddi Lebanon | Beirut, Lebanon | March 2018 - Present

*Organizational IT responsibilities formally expanded effective 1 August 2026.*

- Manage ChatGPT workspace setup and staff support; implement AI workflows and train teams in effective ChatGPT, Codex and Microsoft 365 use, including output review and code testing.
- Support staff accounts, Outlook, SharePoint and OneDrive; troubleshoot Windows devices, software and connectivity, and prepare equipment for staff and lab use.
- Build custom systems and dashboards for scheduling, attendance, permissions, reporting and local/online workflows. Maintain websites and support secure backups.
- Standardized staff wireless configurations across 11 wireless devices, including SSIDs, radio channels, firmware maintenance and management security.
- Built a local attendance application with 283 student records, profiles, reporting, exports and backups.
- Design and teach digital literacy, Office, coding and STEAM; create practical assessments and local learning activities for children and youth.

### Computer Science Lecturer and Project Supervisor

EGS University | European Global School | Remote | September 2022 - Present

- Teach programming, databases, web development and applied computing online; develop guided materials for learners with varied technical backgrounds.
- Guide Teachable Machine, Dify chatbot and Python/scikit-learn projects, including data preparation, model evaluation and predictions on new data.
- Supervise web/mobile projects through requirements, implementation, testing and presentation, and assess graduation projects.
- Prepare Python and Android Studio lessons and computing curricula with worked examples, installation guidance and project-based assessment.

## PROFESSIONAL EXPERIENCE CONTINUED

### Technology Trainer and IT Consultant

**Bedayati Lebanon** | Beirut, Lebanon | June 2019 - Present | Recurring assignments

- Delivered a 30-hour online web-development bootcamp in 2026 covering responsive web pages, WordPress, WooCommerce, databases, backups and project presentations.
- Develop digital literacy and web curricula, provide individual project guidance, and track assessments, learner progress and completion needs.
- Coordinate Cisco NetAcad classes and support laptops, networks, websites, WordPress recovery and learner technology requirements.

### Founder and Full Stack Developer

**MABNI** | Beirut and Remote | December 2025 - Present

- Build customized systems, websites, dashboards and WordPress/WooCommerce solutions through mabni.org, from requirements and databases to deployment and maintenance.
- Develop local digital-skills tools and educational resources, using AI-assisted development and practical user feedback to refine applications.

### Sales and Technical Support Specialist

**Madi Tech** | Beirut, Lebanon | 2009 - 2015

- Provided computer sales, hardware/software troubleshooting, repair support and small-office technology guidance.

## SELECTED TECHNICAL DELIVERY

**PSS CareFlow:** Built a Node.js and MySQL/MariaDB platform for reception queues, family/service records, visit workflows, reporting and role-based access, with local and hosted versions and synchronization.

**Tahaddi platforms:** Develop education and administrative workflows, local attendance tools and an early-childhood education platform, alongside network-accessible learning resources.

**MABNI commercial websites:** Rouh Café QR menu and bilingual editing dashboard; Beirut Essence storefront with product variants, stock management and a private product dashboard.

## TECHNICAL TOOLKIT

**Software:** JavaScript, Python, SQL, Node.js, MySQL/MariaDB, HTML/CSS, Bootstrap, WordPress, WooCommerce, Firebase and XAMPP.

**IT and applied AI:** ChatGPT workspace administration, Codex, Microsoft 365, SharePoint, OneDrive, Windows, MikroTik, PoE/DHCP/DNS, pandas, scikit-learn and Dify.
